SKILLS

Java 17
Spring Boot
Go
Kafka
PostgreSQL
Redis
AWS (EKS, Aurora, SQS)
Kubernetes
Docker
gRPC
System design
Observability (Prometheus, Grafana)

EDUCATION

B.E., Computer Engineering
Pune College of Engineering (sample)
2021

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (2024)

EXPERIENCE

Senior Software Engineer Apr 2023 – Present
Freightly (logistics SaaS) · Pune

- Designed the shipment-tracking event pipeline on Kafka and Spring Boot handling 40K events/sec at p99 < 120 ms.
- Split a monolith into 7 services on Kubernetes (EKS); deploy time from 45 min to 8 min.
- Cut AWS spend by 31% (~₹42 lakh/year) through right-sizing, Graviton instances and Aurora tuning.
- Mentor 4 engineers; run design reviews and the backend guild.

Software Engineer Jul 2021 – Mar 2023
Paisa Ledger · Mumbai

- Built the double-entry ledger service in Java 17 with PostgreSQL; zero reconciliation breaks over 14 months.
- Added idempotency and outbox patterns to payment APIs, removing duplicate debits.
- Wrote Go workers for bank statement ingestion (50+ bank formats).
